

About Smart Invest

Smart Invest is the principal investment firm focusing on areas from fintech and blockchain to artificial intelligence and machine learning.

The areas of technology where Smart Invest focuses its active investments – artificial intelligence, augmented reality, computer vision, fintech and blockchain – require a combination of very specific and rare skills as well as a lot of processing power.

Since 2012, Smart Invest has backed cutting-edge technology companies working with founders to develop and build powerful technologies and great products.

As an investor, Smart Invest is highly active in each business it supports, taking a board position to ensure it maintains a hands-on approach in order to supercharge growth, valuations, scale and sales.

Smart Invest is focused on growing its current investments and innovative technology projects, and always open to spotting the next new technology trend and business opportunity.
